

# Frequency measurement

## ToDo @ ResLab

- Analyze: all error signals
  - Reprare
  - Ceo
  - Intensity lock R1
  - PDH Lock
  - TA Lock
  - Fiber stabilization
- [✓ ssauer, 2017-02-22] What are the limitations of the frequency comb?
- Test new virtual beat setup
  - without EDFA
  - with new electronic box
- MASER: Sync vs GPS (over 1 week) and correct for deviations

## ToDo @ AtomLab

- AC Stark shift: Clock laser
- [✓ fim, 2017-01-24] measure the clock laser waist
- [✓ fim, 2017-01-24] focused or kollimate clock laser?
- AC Stark shift: Lattice Laser
- Recheck magnetic fields: Compensation Coils and Hom. Coil
- measure Zeemann
- collisions?
- shut off stabilizations: influence on the linewidth?
- Stability of the clock: Make selfcomparison and check averaging

## ToDo after

- check all values
