

Recent interesting papers

1. Realization of a Rydberg-dressed atomic clock: <https://arxiv.org/pdf/1810.04151.pdf>
2. Microscopic control and detection of ultracold strontium in optical-tweezer arrays
[https://arxiv.org/pdf/1810.06626](https://arxiv.org/pdf/1810.06626.pdf)
3. Alkaline earth atoms in optical tweezers [https://arxiv.org/pdf/1810.06537](https://arxiv.org/pdf/1810.06537.pdf)
4. Bosonic space clock <https://journals.aps.org/pra/pdf/10.1103/PhysRevA.98.053443>
5. Optical clock intercomparison with 6×10^{-19} precision in one hour
<https://arxiv.org/pdf/1902.02741.pdf>
