

Net View

For starting Net View klick only once and wait, the program needs time 😊 !

If Net View doesn't start, then restart the computer!

“Connection”-window:

“GPS receiver”-button must be selected.

Push “connect”-button.

The screenshot shows the Net View software interface. On the left is a sidebar with a 'Connection' tab selected, containing 'Receivers', 'Parameters', 'Files', 'Greis commands', 'Real-Time Logging', and 'Help'. The main window is titled 'Net View' and contains the following elements:

- Recall from slot:** A row of buttons for Slot 2 through Slot 10. The 'GPS Receiver' button is highlighted.
- Connection settings GPS Receiver:**
 - Port:** A dropdown menu set to 'COM2'.
 - Baud Rate:** A dropdown menu set to '115200'.
 - Advanced:** A button to toggle advanced settings.
 - Refresh Ports:** A button to refresh the port list.
 - Save to slot:** A dropdown menu set to 'GPS Receiver'.
 - Slot name:** A text field containing 'GPS Receiver'.
 - Save:** A button to save the settings.
 - Connect:** A large button to initiate the connection.
- Last connections:** A table showing the history of connections.

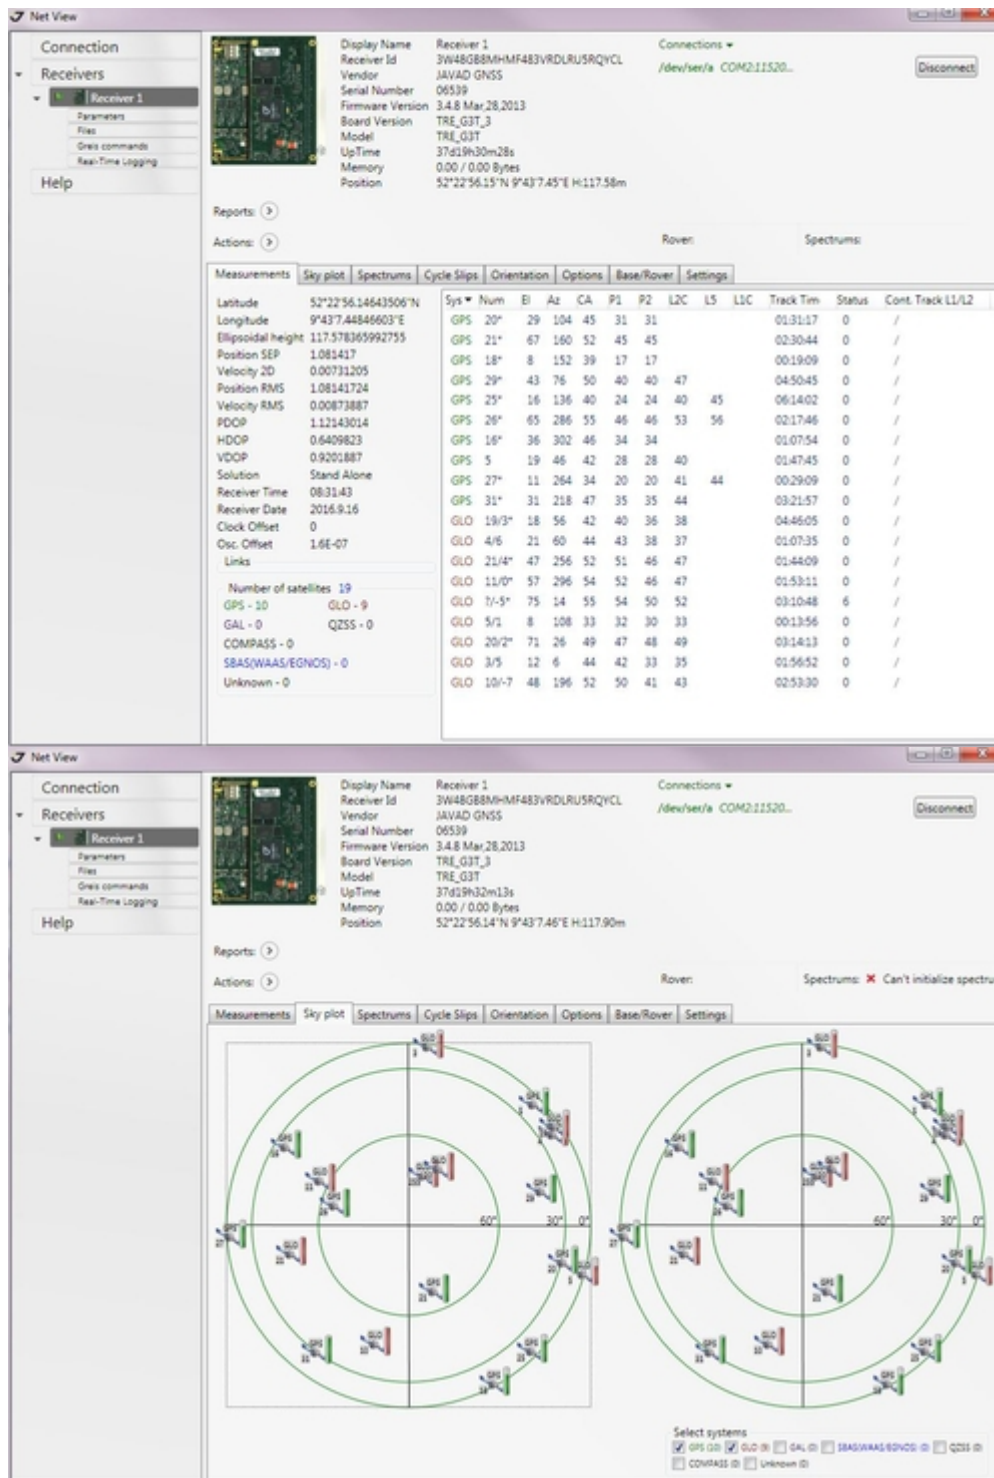

Connection settings	Status	Time	Slot
SER COM2:115200, 8, One, True	Access to the port 'COM2' is denied.	9/16/2016 8:29:28 AM	GPS Receiver
SER COM2:115200, 8, One, True	Connected to receiver ID:3W48GB8MHMF483VRDLRU5RQYCL /	9/16/2016 8:21:08 AM	GPS Receiver
SER COM3:115200, 8, One, True	Receiver on port COM3 was not found.	9/16/2016 8:20:59 AM	GPS Receiver

At the bottom right of the window is a 'Remove Disconnected' button.

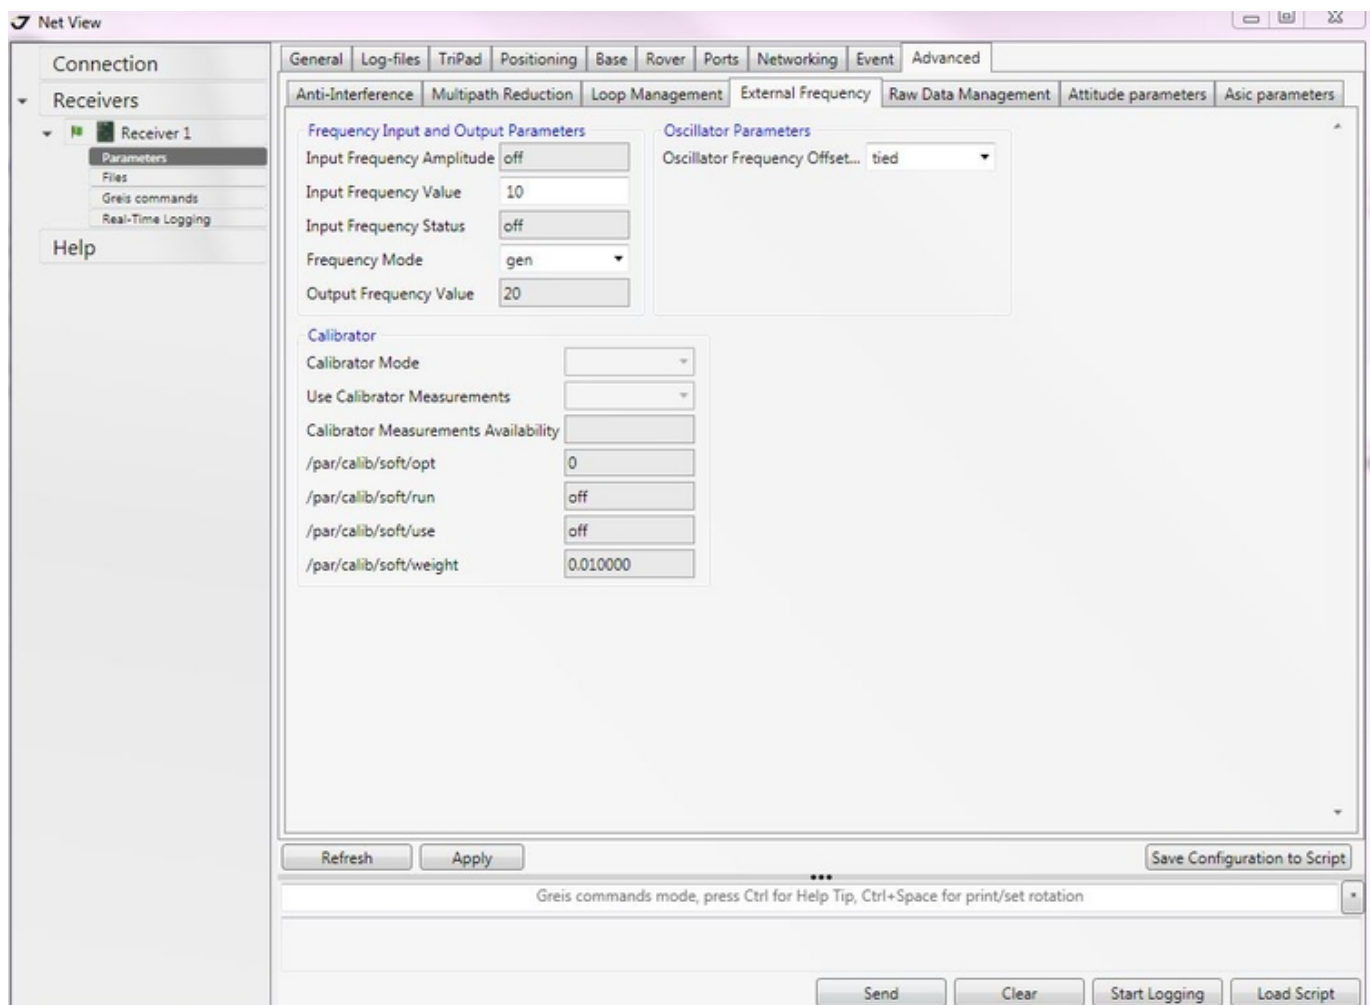

“Receiver”-window:

The “Measurements”-button/setting shows the coordinates of the satellites.

The “Skyplot”-button/setting shows the connections with the satellites and the names.

You can change the reference frequency from "Empfänger 1" under "**Parameter**"-window → "Advanced"-button → "External frequency"-button.
