

# Notes/Informations

## Frequency-Comb Hannover

Channel	Measured	Frequency	Sign	Interval (axis)	Max outliers (Alarmschwelle)	F(x)
CH1	IQ-Resonator (R1) vs. Comb	29.347 MHz	-	$\pm 900$ Hz	500 Hz	-fx
CH2	CEO	20 MHz	-	$\pm 0.24$ Hz	0.15 Hz	-fceo
CH3	Reprate/16	6.250001 MHz		$\pm 0.0018$ Hz	0.001 Hz	frep/16
CH4	Link vs. Comb	22.432 MHz	-	$\pm 900$ Hz	500 Hz	-fy
CH5	Virtualer Beat (Link vs. IQ-Laser)	21,27173 MHz		$\pm 18$ Hz	10 Hz	fv
CH6	Manypoint-AOM	36 MHz		$\pm 18$ Hz	10 Hz	
CH7	Stell-AOM vom IQ-Laser	35.0X MHz		$\pm 4000$ Hz	2000 Hz (+ correction of Offset)	f_Stell
CH8	Rubidiumuhr referenziert auf GPS	10 MHz		$\pm 0.0018$ Hz	0.001 Hz	

- Modenverhältnis: Ratio:  $N = n_{916}/n_{Link} = 3275292/1944000 = 1.684820987654321\dots$
- Repetitionsrate: 100,0000226 MHz

- AOM (+77.111 MHz) used for atom-lock + fiber stabilization(5m)
- AOM (+80.111 MHz) used for fiber stabilization(30m)
- Double-pass AOM (-2\*102,XX MHZ) used for spectroscopy (frequency shift), feedback-loop!!!
- Channel 7 = 138 MHz (Synthesizer, referenced by 10 MHz GPS) - Double-pass AOM
- Atom frequency:  $\nu_{\text{opt}}(\text{Mg}) = (3275292 * \text{col}(e) * 16 - 2 * \text{col}(d) - \text{col}(\text{C}) + 80,111\text{e}6) * 2 + 77,111\text{e}6$
- Laserfrequency:  $f_{\text{laser}} = 3275292 * \text{frep} * 16 - 2 * \text{fCEO} - f_x$
- Resonator 1 frequency:  $f_{\text{R1}} = 3275292 * \text{frep} * 16 - 2 * \text{fCEO} - f_x + (-2 * f_{\text{AOM\_R1}})$
- Double-pass AOM:  $f_{\text{AOM\_R1}} = 138 \text{ MHz} - f_{\text{Stell}}$

## Virtual-Beat

- $f_v = (f_y + f_{CEO}) - ((f_x + 2 * f_{CEO}) / (3275292 / 1944000)) + (2 * 10 \text{ MHz})$

## Evaluation (PTB)

- $f_x = \text{col}(\text{C})$  (#1, negatives  $f_x$ )
- $f_{CEO} = \text{col}(d)$  (#2) (negatives  $f_{CEO}$ )
- $\text{frep} = \text{col}(e)$  (#3,  $\text{frep}/16$ )

## Test analysis

- $\nu_{\text{opt}}(\text{Mg}) - \nu_{\text{(Mg2015)}}[\text{Hz}] = \nu_{\text{opt}}(\text{Mg}) - 655058646691000$   
 $\rightarrow \nu_{\text{opt}}(\text{Mg}) - \nu_{\text{(Mg2015)}}[\text{Hz}] = (f_{\text{laser}} + 80,111\text{e}6) * 2 + 77,111\text{e}6 - 655058646691000$

## Frequency-Comb Braunschweig

# Clocks hight in respect to the geoid

In front of the university are studs, which which are used as a reference. The hight will be given by Dr. Heiner Denker (Institut für Erdvermessung (IFE)), he will also estimate the experiments hight witch

higher precision soon. For questions contact: D.Fim
