

SS, NJ, WFP, kHz

## General

- What about Philips Thesis, if lockdown is going on for an extended time (to be expected :())
  - Add some of the simulations of WFP/Nishad to his Thesis?

## NJ

- Thesis going on
- Taking look on how locking clocklaser to atoms might introduce noise

## WFP

- Setup of Sysiphus cooling simulation

## SS

- Noise calculations going on
- Factor 2 difference to Cole calculations
  - kHz: Could it be, that Cole or SS used a parameter derived from a PSD (or a PSD directly) which was a One Sided PSD but treated as a full PSD (or vice versa?)

## Fiene/kHz

- Allan-Live-Python going on
- gui creation using QtPy via Qt Designer most promising way to build a GUI
- Fiene started on importing/reading files
