

# Jour Fixe

WFP, SS, FW, NJ, Nishad, PG

## General

- Students allowed as stated by the professors at the group seminar
- WFP back to lab: NJ needs 2-3 more weeks for his measurements and then can hand over lab control

## Atomslab

- Verdi seems to have other problems than temperature
  - We are out of warranty though
- Going on with lattice AC stark shift

## ResLab

- Working on comb to couple in the (old) PFC
- The new PC might be too efficient so that laser safety might not be given with the current glasses anymore

## Waldemarsimulation

- Going on to resolve open questions from the group seminar
- Nishad compares the script to fit the paper results for Sr
