

Jour Fixe

SS, WFP

Atomslab

- Laser 2 TA lenses were repositioned, because they had misaligned during AC shut down

Reslab

- Frequency-Comb does not mode-lock
- AC and DC values do not suggest that LD is broken
- Clock TA is coupled: 180 mW @ 1,2 A

Quench

- SHG-Board has moved to Atoms Lab on the clock laser table

PTB/Meta-mirror

- Referencemirrors were characterized, next will be the Meta-mirrors
