

WFP, NJ, PG, SS, Nichad

# Atomslab

- Last week, swap measurements started
- First SWAP effects seen today (900 kHz reduced by 50 kHz on a line-scan)
- PG prepares his talk for his M.Sc defense (19.11)

## Nandan Paper(s)

- Bulletpoint
- Figures prepared nicely, Ernst likes it.

## Reslab

- Measurements @ LENA
- Can't measure reflectivity of Meta-Mirrors → Delay of ringdown too high
  - Indicates that the finesse  $< 5k$
  - Probably the surface quality the issue?
- Prepares latest results into presentation for thursday
