

NetView

For starting Net View klick only once and wait, the program needs time 😊 !

If Net View doesn't start, then restart the computer!

“Connection”-window:

“GPS receiver”-button must be selected.

Push “connect”-button.

“Receiver”-window:

The “Measurements”-button/setting shows the coordinates of the satellites.

The “Skyplot”-button/setting shows the connections with the satellites and the names.

Help

Display Name Receiver 1
Receiver Id 3W48GB8MHMF483VRDLRU5RQYCL
Vendor JAVAD GNSS
Serial Number 06539
Firmware Version 3.4.8 Mar 28, 2013
Board Version TRE_G3T_3
Model TRE_G3T
UpTime 37d19h30m28s
Memory 0.00 / 0.00 Bytes
Position 52°22'56.15"N 9°43'7.45"E H:117.58m

Connections **▼**
 /dev/ttyS0 COM2:11520... **Disconnect**
