Safety at IQ

The safety instructions are hosted completely online by Secova

Every employee or student that works at the IQ must pass the instructions before effectively starting to work. An IQ account is mandatory for being able to pass the instructions.

Safety refreshers

Instructions need to be refreshed at least once a year. You will receive a reminder once a course is due.

F.A.Q.

- I cannot login: If your IQ account is new or has been re-activated (or was updated to have access to the safety system), you only will be able to login at Secova the next day after 3h am.
- I cannot start certain instructions or only next year: Some instructions have an interval of 2 years and you passed the instructions already last year.

Previous safety instructions

The old slides and safety instructions have been archived here.
